Weather Briefing

Forecast Highlights

- Strong cold front pushing through the region Friday night into early Saturday morning, bringing colder air driven by gusty northwest winds.
- Temperatures on Saturday are forecast to not get out of the 50s over most of the area.
- Low temperatures Sunday morning are forecast to range from 32 degrees or below across inland sections and from the mid 30s over the outlying suburbs of the east and west coasts, upper 30s Gulf coast, and upper 30s to lower 40s over most of metro SE FL.
- Lowest wind chill readings early Sunday to be in the 20s around Lake Okeechobee, and near 30 to the lower 30s elsewhere.

Forecast Changes

- Next Freeze Outlook scheduled for midday Thursday, January 27th.

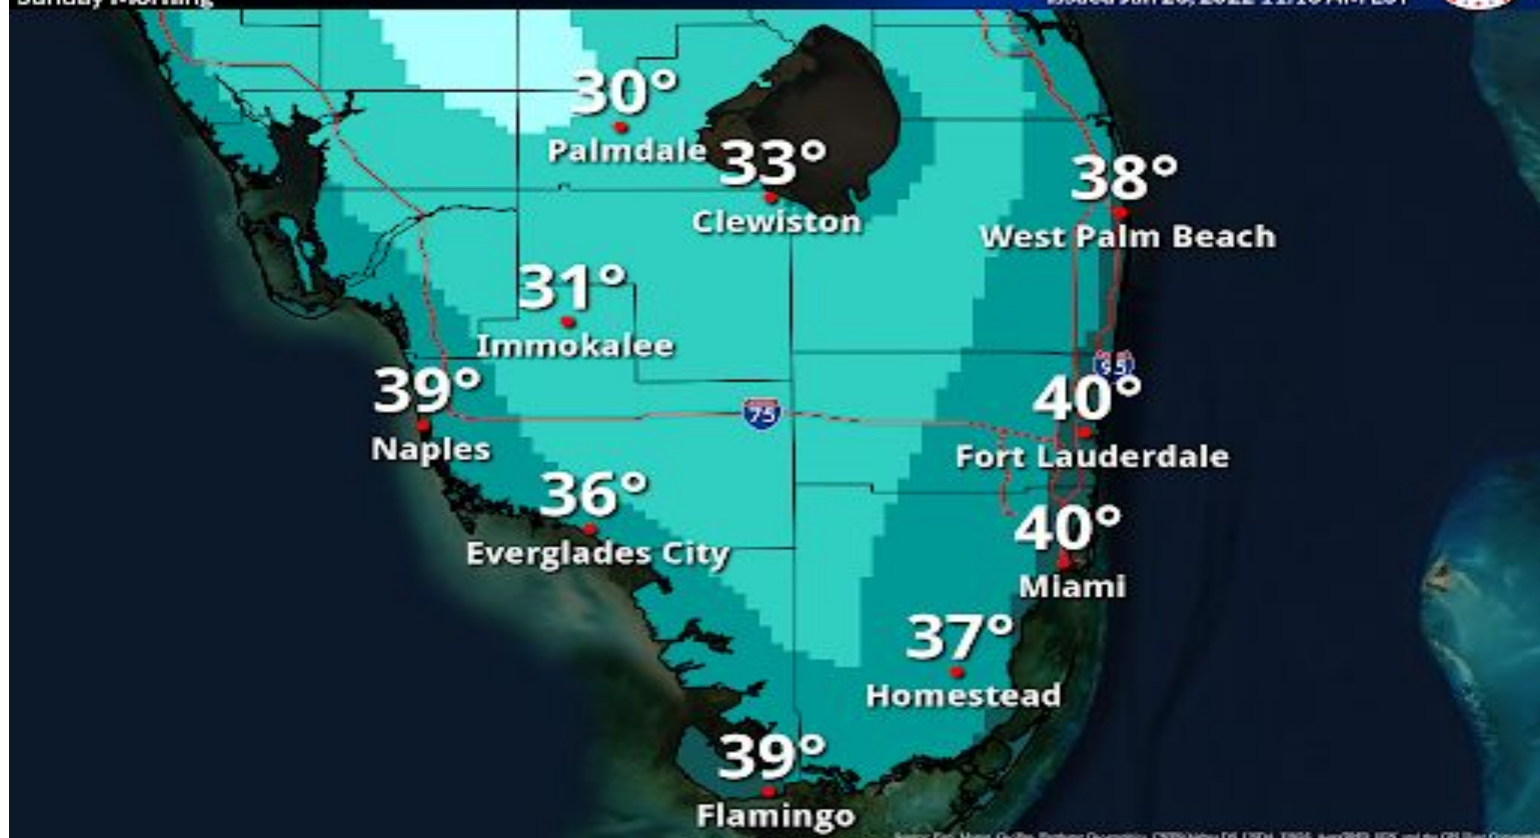

Risk Level	Category	Definition
	None	No Excessive Cold Risk.
	Limited	Limited Excessive Cold Risk. Apparent temperature 40-50 degrees. Highly-vulnerable population should seek shelter.
	Elevated	Elevated Excessive Cold Risk. Apparent temperature 33-39 degrees. Hypothermia possible with prolonged exposure.
	Significant	Significant Excessive Cold Risk. Apparent temperature 26-32 degrees. Frostbite and hypothermia possible with prolonged exposure.
	Extreme	Extreme Excessive Cold Risk. Apparent temperature 25 degrees or lower. Frostbite and hypothermia likely with prolonged exposure.
